

## ISO CERTIFICATION: INTUISKIN MOVES TO THE NEXT STAGE

*ISO certification awarded to MEMSCAP and its subsidiary IntuiSkin in less than 6 months*

**Grenoble, France and Durham, North Carolina, September 3, 2007** – MEMSCAP (NYSE Euronext: MEMS), the leading provider of innovative solutions based on MEMS (micro-electro-mechanical systems) technology, today announces that its subsidiary IntuiSkin, the Skin technology specialist, has obtained the ISO 9001:2000 certification.

This certification obtained in a 6 months record time, has been awarded to MEMSCAP and IntuiSkin without reserve, remarks or non-conformities. IntuiSkin, which products already are certified CE, reaches yet another level of its development, while MEMSCAP consolidates certifications that already are in place in the Group other manufacturing sites.

International Standard ISO 9001:2000 specifies the demands related to quality management systems when a company needs to demonstrate its ability to regularly provide a product in conformity with the customers and regulatory requirements and/or wants to increase its customer satisfaction through an efficient use of the system, including the continual improvement process and the assurance that it will conform to the customers and regulatory requirements.

Obtaining ISO certification, like the CE marking, the TL9000, AS 9100 ; ISO 13485: 2003 or DO178B level B certifications, comes within the frame of MEMSCAP Group worldwide quality and customer satisfaction approach.

For IntuiSkin, which rapid growth has achieved many milestones over the last quarters, such as the appointment of cosmetic specialist Vera Strübi to MEMSCAP board of directors, the set up of the production tools on a new dedicated site, the simultaneous arrival of a manufacturing director highly knowledgeable in volume manufacturing, Mickaël Odier, ISO certification was the logical and needed element to perfect the set up of IntuiSkin tools for growth. It should be highlighted that this progression has been accompanied by a 2007 first semester revenue higher than the one of the whole FY 2006.

« All MEMSCAP Group companies are certified, in the USA, Norway, and now France. » explains Jean-Michel Karam, MEMSCAP Chief Executive Officer and Chairman. “ This fits within the frame of a quality process approach that has always been MEMSCAP’s and reinforces the ongoing actions we take to permanently strive for excellence and reliability. IntuiSkin certification, specifically, is a major milestone in the development of this very high potential business. ”

### ***About MEMSCAP***

MEMSCAP is the leading provider of innovative micro-electro-mechanical systems (MEMS)-based solutions.
