

MEMSCAP CONSUMER BUSINESS GAINS SPEED

The MEMS leader Custom Products Business Unit accepted a US\$ 8.500.000 Purchase Order for Consumer market products

Grenoble, France and Durham, North Carolina, July 23, 2007 – MEMSCAP (NYSE-Euronext: MEMS), the leading provider of innovative solutions based on MEMS (micro-electro-mechanical systems) technology, announced today it has accepted a Purchase Order for a total amount of US\$ 8.500.000, to manufacture a consumer product. This purchase order complements an initial one delivered over the first 2007 quarter for an amount of 0.3 million US dollars.

One of MEMSCAP three core businesses (Custom Products, Standard Products, IntuiSkin), the Custom Products business unit based in North Carolina provides custom products (wafers, MEMS dies and wafer level packaged devices) and manufacturing services for the whole spectrum of MEMS applications. Specifically, this Business Unit today serves the biomedical, telecommunications, optical, low drift inertial sensor applications and consumer markets.

Those fields have in common their high growth potential, quick increase of demand, extreme needs for reliability and adaptability, as well as an extremely short time from design to market. Telecommunications and consumer markets also share a common need for high-volume manufacturing and industry certifications.

The Purchase Order placed with MEMSCAP for a total value of 8.5 million US dollars will represent tens of millions of units delivered to the customer. These units will be delivered according to milestones based on MEMSCAP manufacturing capacity and the customer schedule. The first release and delivery has already been agreed by MEMSCAP and the Customer, with a first milestone representing more than 5 million units mainly over Q3, 2007.

“The strategic choices made by MEMSCAP Group for our Custom Products Business Unit enable us today to deliver breakthrough technology products at a cost effective price for the consumer market”, explains Ron Wages, General Manager of the CP Business Unit. “We intend to increase our presence on this segment with the existing products as well as with new applications”.

This order is representative of the momentum gained by the Custom Products Business Unit and that should intensify over the coming terms as several programs are shifting from engineering to pre-production status as well as from pre-production to volume manufacturing.

About MEMSCAP

MEMSCAP is the leading provider of innovative micro-electro-mechanical systems (MEMS)-based solutions. MEMSCAP standard and custom products and solutions include components, component designs (IP), manufacturing and related services. MEMSCAP customers include Fortune 500 businesses, major research institutes and universities. The company's shares are traded on the Eurolist of Euronext Paris S.A (ISIN: FR0010298620-MEMS), where MEMSCAP belongs to the Next Economy segment. More information on the company's products and services can be obtained at www.memscap.com.
